

# Sustainability and Climate Solutions

Sustainability and climate change have been driven to the top of the agenda for business leaders due to the escalating demands from capital markets and regulatory authorities for a compelling environmental, social, and governance (“ESG”) strategy and a decarbonization pathway. Amid the rise in investor expectations and change in global regulations, corporates unavoidably face unprecedented challenges in managing risks and capturing opportunities in the transition to a low-carbon economy.

CIPCS's **Sustainability and Climate Solutions** strives to support corporates in advancing sustainable and resilient growth by transforming visions into actions and impacts. CIPCS works with clients to develop ESG strategy, identify value creation opportunities and strengthen their business resilience. Enabled by our artificial intelligence (“AI”) and business intelligence (“BI”) ESG tech, CIPCS's breadth of ESG advisory services, industry experience, and capital markets insights help corporates remain relevant and responsive to ESG conscious investors and customers while being a positive force to the environment and wider community.

## ► Five Core ESG Services ◀
